

Installation Instructions Nissan X-Trail (2014+)

Step

Instructions

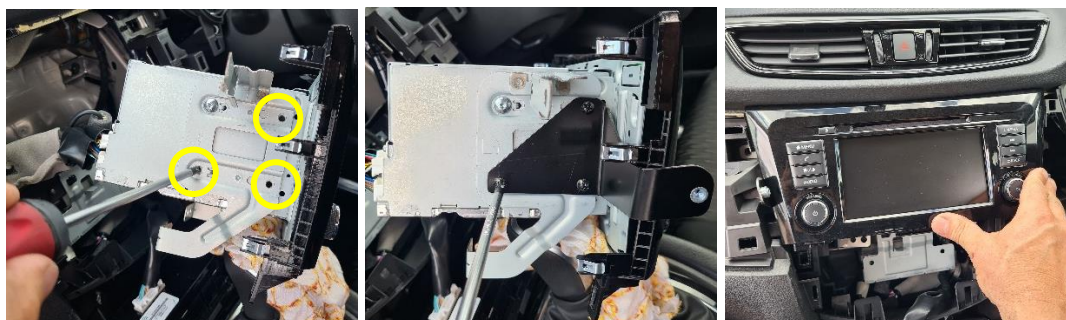

- 1** Carefully loosen passenger side panel. Remove 1 x screw, air vent and dash piece.

- 2** Remove AC control unit, then remove driver's side panel. Remove 2 x screws, then loosen display unit.

- 3** Remove screws from 3 x locations, then install side bracket. Place display unit back into dash.

- 4 Install lower bracket using 2 x previously removed screw locations. Return driver's side panel.

- 5 Return all dash components to their original state.

- 6 Install front dash bracket, using 3 x mounting points.

Enjoy your new InDash Mount
